The Embedded Librarian: Taking Knowledge Where It’s Needed

Bibliography

The bibliography includes most works cited in the book as well as other works related to the theme of embedded librarianship. It is organized by organization type, including sections for academic libraries; medical libraries; libraries in corporate, government, and other specialized organizations; schools and public libraries; with a category for general and other works. Works relating to more than one sector (academic, medical, corporate and specialized, school and public) may be listed more than once.
